

## SPEAKER PROFILE

Doctor Marie-Josèphe DESHAYES, Medical doctor, specialized in Orthodontics and early orthodontic treatments before the age of 6. She has been investigating dento-facial disharmonies since 1981, from private practice as an orthodontist in France. By understanding the driving forces specific to each malocclusion, she developed original treatments in lacteal dentition in order to ensure a well-balanced cranial and facial growth. She has been teaching this new prospects on orthodontic treatments since 16 years.

In collaboration with

EUROOCLUSION ITALIA  
Associazione Medico Scientifica

## COURSE PROGRAMME

For the first time in Italy, a full training course with Dr. Marie-Josèphe DESHAYES.

The course will last 9 days divided in 3 workshop of 3 days each.

The early orthopedics treatment on child under the age of 6 must be done by orthodontist who have achieved particular skills and knowledge.

Dr. Marie-Josèphe DESHAYES has been teaching since 2000 how to treat orthopedically these little child, how to change shape and relation between dental arches in milk dentition, and how to reorganize the cranial and facial growth through mastication forces.

Cranial kinematics and biomechanics, the occipital and sphenoid flexion, glenoid cavity morphogenesis. The external rotation of the maxilla and temporal bones.

The definition of "cranial occlusion" and "postural occlusion" at the age of 3.

The cranial model and the disharmony in class I, II and III; the cranial asymmetry.

The use of BDCF for the Bio Dynamic Cranio-Facial evaluation. The use of Orthogrille® in arches analysis. How to improve TMJ symmetry and rebalance the cranial kinetics.

Define the treatment plan and therapeutic process.

The full programme is now available on following web sites:
